

Morgan Jones

Associate

Brown Rudnick

mjones@brownrudnick.com

Morgan Jones is an associate in the Firm’s Corporate Practice Group and a member of the Emerging Growth Companies & Venture Capital Group. He represents early- and growth-stage technology companies through all stages of the technology lifecycle, from structuring, formation, financing, licensing, and data privacy matters through exit. He works closely with companies to launch and develop products, build customers and scale, acquire technology assets, and negotiate customer deals and strategic partnerships. He also advises small and mid-cap companies on M&A, joint venture, and strategic investment matters.

As a certified information privacy professional (CIPP), the ANSI-accredited gold standard in privacy certification, he frequently advises companies on legal and operational compliance with various privacy laws, including the GDPR and the California Consumer Privacy Act (CCPA) among others, both in the U.S. and abroad. Recently, Morgan earned the Certified Information Privacy Professional/Europe (CIPP/E) certification, the first professional credential specific to European data protection, equipping him with a comprehensive knowledge of the principles-based framework of pan-European and national data protection laws, the European model for privacy enforcement, key privacy terminology and practical concepts concerning the protection of personal data and trans-border data flows.

Morgan has extensive experience as an in-house attorney who understands how companies run. He previously served as in-house privacy and contracts counsel at an AmLaw 100 firm, handling its global General Data Protection Regulation (GDPR) compliance initiative. He also has held in-house positions with a B2C company and a specialty chemical manufacturing company—experience that enables him to partner with clients and effectively handle their business needs. He regularly advises clients on nondisclosure agreements, regulatory/FTC guidance, brand protection, IP, and contract negotiations, including software as a service (SaaS) and other vendor contracts.

Morgan received his J.D. from Seton Hall University School of Law with an Intellectual Property concentration and his B.S. from Rutgers University School of Engineering.
